

John A. Doe

(555) 123-4567 | johndoe@email.sc.edu | linkedin.com/in/johndoe | github.com/johndoe

EDUCATION

University of South Carolina, Honors College
B.S. Computer Science, Minor in Mathematics

GPA: 3.95
Aug 2022 – May 2026

Honors: President's List (3 semesters), Dean's List, Phi Beta Kappa

Coursework: Data Structures, Algorithms, Operating Systems, Networks, Machine Learning, Distributed Systems

RESEARCH EXPERIENCE

Distributed Systems Laboratory
Research Assistant, Dr. Jane Smith

Columbia, SC
Jan 2024 – Present

- Developed Byzantine fault-tolerant consensus protocol achieving 99.7% availability under network partitions
- Implemented distributed key-value store using Raft protocol in Rust (50,000+ lines of code)
- Co-authored paper submitted to SOSP 2025 on fault tolerance in edge computing environments
- Designed benchmark suite measuring latency and throughput across 100-node clusters

Machine Learning Research Group
Research Intern, Dr. Robert Johnson

Columbia, SC
May – Dec 2023

- Built transformer model for protein structure prediction with 15% improvement over baseline
- Processed 2TB genomic dataset using Apache Spark for distributed feature extraction
- Created open-source PyTorch library for biological sequence embeddings (500+ GitHub stars)

PROFESSIONAL EXPERIENCE

Amazon Web Services
Software Development Engineer Intern

Seattle, WA
May – Aug 2024

- Designed microservice architecture reducing API latency by 40% for customer dashboard serving 10M+ users
- Implemented CI/CD pipeline with automated testing achieving 95% code coverage
- Migrated legacy Java codebase to Kotlin, improving maintainability scores by 30%

LEADERSHIP EXPERIENCE

ACM Student Chapter
Vice President

Columbia, SC
Aug 2023 – Present

- Led team of 15 to ICPC regionals placing 12th of 120 teams; organized weekly workshops with 50+ attendees
- Mentored 8 undergraduate students in algorithms and competitive programming fundamentals

PROJECTS

Autonomous Drone Navigation
Distributed File System
Real-Time ML Pipeline

Python, ROS, OpenCV
Rust, gRPC, Docker
Scala, Kafka, Spark Streaming

SKILLS

Programming:

Python, Rust, C/C++, Java, Kotlin, JavaScript/TypeScript, SQL, Go, Scala

Tools & Frameworks:

PyTorch, TensorFlow, React, Docker, Kubernetes, AWS, Git, PostgreSQL

Core Competencies:

Distributed Systems, Machine Learning, Systems Design, Microservices
