

How to Write/Discuss a Case Study Analysis?

A case study analysis requires you to investigate a business problem, examine the alternative solutions, and propose the most effective solution using supporting evidence.

Step 1: Preparing the Analysis

Before you begin writing, follow these guidelines to help you prepare and understand the case study:

- 1. Read and Examine the Case Thoroughly**
 - Take notes, highlight relevant facts, underline key problems.
- 2. Focus Your Analysis**
 - Identify two to five key problems.
 - Why do they exist?
 - How do they impact the organization?
 - Who is responsible for them?
- 3. Uncover Possible Solutions/Changes Needed**
 - Review course readings, discussions, outside research, your experience.
- 4. Select the Best Solution**
 - Consider strong supporting evidence, pros, and cons. Is this solution realistic?

Step 2: Drafting the Analysis

Once you have gathered the necessary information, a draft of your analysis should include these general sections, but these may differ depending on your assignment directions or your specific case study:

- 1. Introduction**
 - Identify the key problems and issues in the case study.
 - Formulate and include a thesis statement, summarizing the outcome of your analysis in 1–2 sentences.
- 2. Background**
 - Set the scene: background information, relevant facts, and the most important issues.

- Demonstrate that you have researched the problems in this case study.

3. Evaluation of the Case

- Outline the various pieces of the case study that you are focusing on.
- Evaluate these pieces by discussing what is working and what is not working.
- State why these parts of the case study are or are not working well.

4. Proposed Solution/Changes

- Provide specific and realistic solution(s) or changes needed.
- Explain why this solution was chosen.
- Support this solution with solid evidence, such as:
 - Concepts from class (text readings, discussions, lectures)
 - Outside research
 - Personal experience (anecdotes)

5. Recommendations

- Determine and discuss specific strategies for accomplishing the proposed solution.
- If applicable, recommend further action to resolve some of the issues.
- What should be done and who should do it?

Step 3: Finalizing the Analysis

After you have composed the first draft of your case study analysis, read through it to check for any gaps or inconsistencies in content or structure:

- Is your thesis statement clear and direct?
- Have you provided solid evidence?
- Is any component from the analysis missing?

When you make the necessary revisions, proofread and edit your analysis before submitting the final draft.
