

CSCE 775: Deep Reinforcement Learning

Paper Presentation

Presentation Content

The presentation is a chance for you to describe a reinforcement learning, deep learning, or search research paper to the class. The research paper you present can be related to your project or from a different topic related to the class. During your presentation you should:

- Describe the problem that the paper is solving
- Discuss the approach used in the paper
- Discuss the paper's results
- Give your opinion on the paper
- Discuss potential for future work

You can also pose questions you have about the paper to the class.

The presentation should be 5-7 minutes long with well prepared slides. There will be some time after the presentation for questions.

Please email me the paper you plan to present as soon as possible.
