

Diagram 1: CFAR Sliding Window Variants

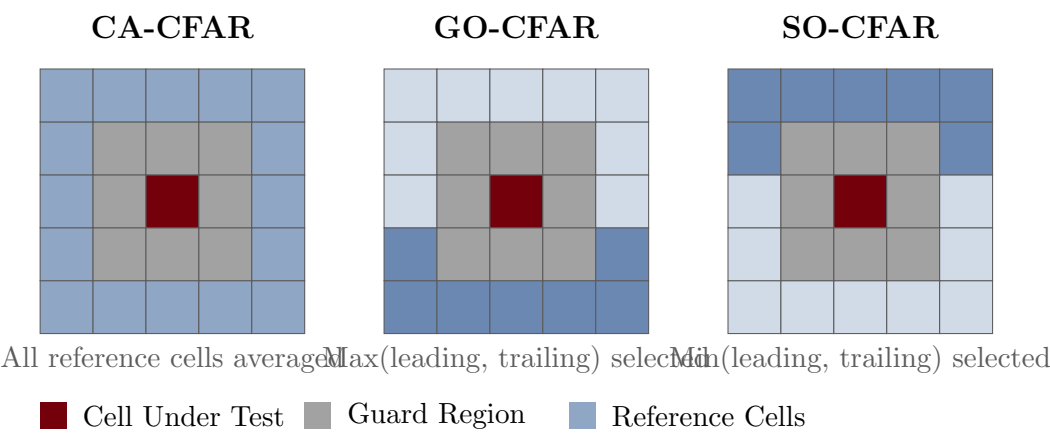

Diagram 2: Range-Azimuth to PPI Mapping

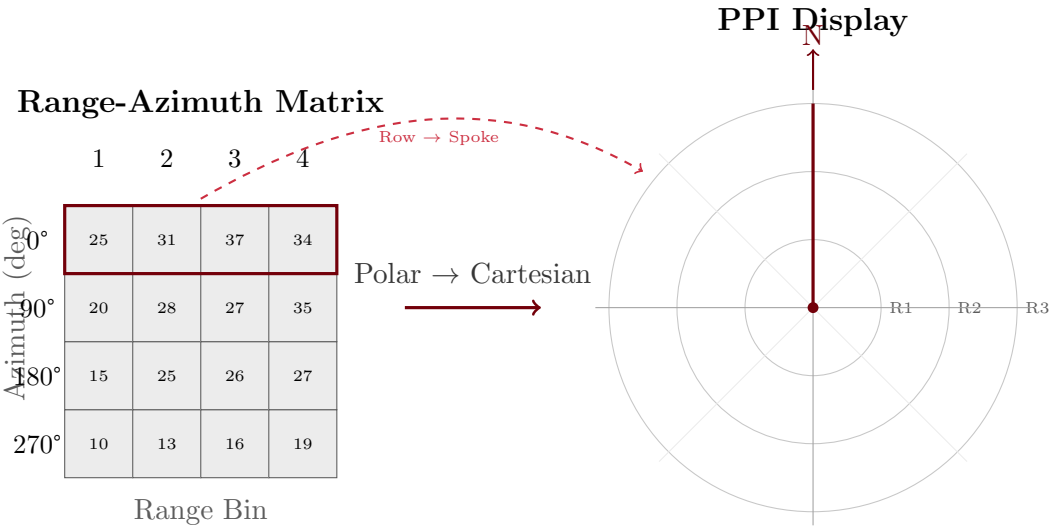

Diagram 3: Coverage Score Illustration

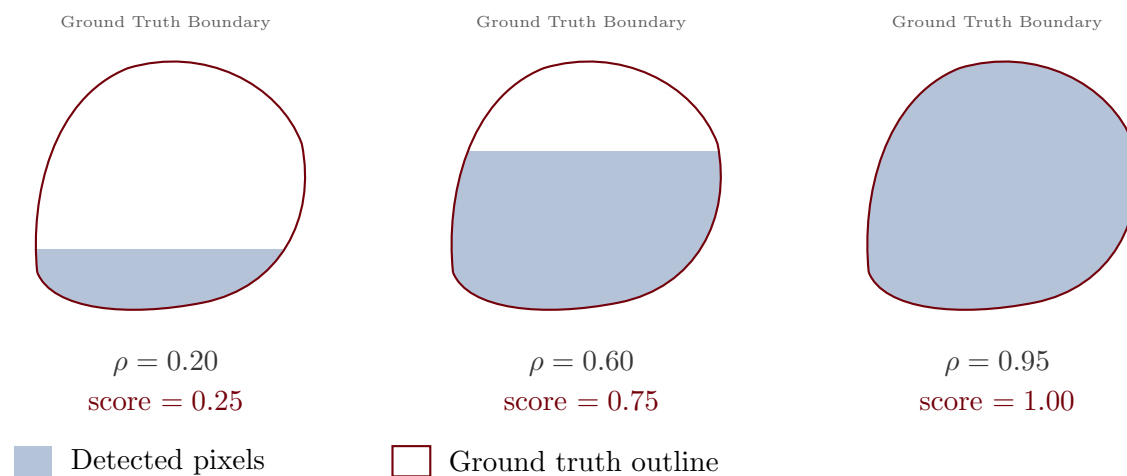

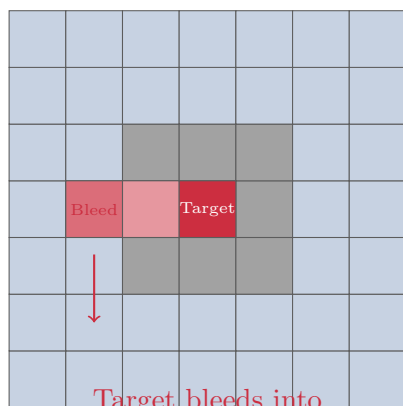

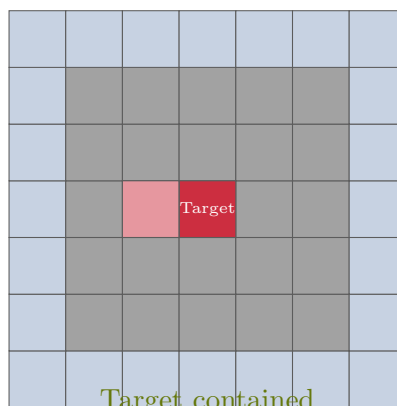

Diagram 4: Guard Cell Size Effect

(a) Guard Too Small

→ biased noise estimate
→ missed detection

(b) Guard Appropriate

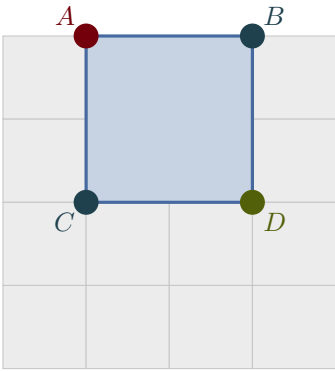

Target contained
in guard region
→ unbiased noise estimate
→ correct detection

Diagram 5: Integral Image (Summed Area Table)

Original Image					Integral Image			
3	1	2	4	$\xrightarrow{\Sigma}$	3	4	6	10
1	5	3	2		4	10	15	21
0	2	1	3		4	12	18	27
4	1	0	2		8	17	23	34

$O(1)$ Box-Sum Query

$$S = I(D) - I(B) - I(C) + I(A)$$

4 lookups, constant time
