

Instructions and Rubric for Mini Projects

1 Instructions

This assignment will be submitted in a report format. This assignment is graded on its ability to clearly express the ideas at hand. Consider this to be a professional report where you are trying to convey to a client the challenges associated with their “system”. Use clear figures that express the method you used to solve the problem. The report must be under two pages (not including the appendix) on 8.5×11 in paper with 1-inch margins and turned in as a single PDF where the first two pages are the report and the following pages are the appendix. The report must have the following:

While no specific format of the report is provided, please ensure your report has the following:

- A title
- A section titled “Objective” that clearly articulates the objective of the assignment. The first sentence of this section could be formulated as “the objective” of this assignment is to _____”. This section should include an introduction to the project.
- A section titled “Methodology covers the process you used in solving the problem. This may include a few lines of text and a flow chart, or a more detailed text-based description of what you did.
- A section titled “Results and Discussion” that outlines the intermediate (where required) and final results obtained and provides context as to the importance of the results.
- An Appendix that includes the code you developed from the project. This is not included in the two-page limit of the assignment. The code must be properly commented and formatted (i.e. it should look like code in an editor).

2 Grading Rubric (100 Points)

2.1 Overall Presentation (20 Points)

- **Title (5 points):** Clear and relevant to the assignment.
- **Formatting (10 points):** Adheres to the 2-page limit, uses 8.5 x 11 in paper with 1-inch margins and submitted as a PDF.
- **Clarity and Professionalism (5 points):** Report is well-organized, professionally presented, free of grammatical errors, and uses appropriate language.

2.2 Content (60 Points)

- **Objective (15 points):**
 - **Clarity (10 points):** The objective of the assignment is clearly articulated as described, with a well-formulated first sentence.
 - **Introduction (5 points):** Includes an effective introduction to the project that sets context.
- **Methodology (20 points):**
 - **Description (10 points):** Detailed and clear text-based description or a combination of text and flowcharts that accurately describe the methods used.

- **Relevance (10 points):** The methodology described is directly relevant and effectively applied to solving the problem.
- **Results and Discussion (25 points):**
 - **Completeness (10 points):** Outlines both intermediate and final results where required.
 - **Analysis (10 points):** Provides insightful discussion regarding the significance and impact of the results.
 - **Context (5 points):** Connects results to the overall project objectives and implications.

2.3 Appendix and Code (20 Points)

- **Inclusion and Formatting of Code (10 points):** Code is included in the appendix and is not counted towards the page limit. It is well-formatted, mimicking the style of code in an editor (e.g., context-based coloring, indentation).
- **Commenting and Documentation (10 points):** Code is thoroughly commented, making it easy to understand the purpose and functionality of each part.
